

SEEBURGER and IFS

“Quite simply, SEEBURGER has the most complete B2B offering in the market regardless of vertical or geography. IFS' business is built on delivering world-class business applications, based on open standards and designed for easily managed step by step implementation that allow customers the visibility and control to maximise efficiency and profitability within their businesses. SEEBURGER's B2B Gateway fits perfectly into our solution offering and we see it as the market leader for global standards based, trading partner integration.”

–Cindy Jaudon, President & CEO,
IFS North America

“The appointment of SEEBURGER's B2B Gateway as an IFS trading partner integration solution highlights our standing as the leading global B2B integration company. We are delighted to be working with IFS as it has particular strengths in similar vertical and geographic markets to SEEBURGER. We see this as a long term partnership that will be mutually beneficial to both companies and their customers.”

– Bernd Seeburger, Founder & CEO,
SEEBURGER

The advantages of full B2B collaboration are significant. Full visibility within your organization can lead to better communications among trading partners, efficient supply chain operations, and decreased risk and cost. Yet, ever-changing partner requirements, coupled with globally-scattered supplier networks, make total B2B collaboration difficult to achieve.

Global collaboration requires seamless integration. Can it be done?

SEEBURGER and IFS have partnered to make total B2B collaboration possible for your organization. SEEBURGER's B2B Gateway integrates seamlessly with IFS Applications. The result is a fully cohesive incorporation of EDI and B2B standards into your ERP systems.

The SEEBURGER / IFS partnership gives you the benefit of using solutions from two industry leaders with cutting-edge technologies and an extreme depth of knowledge. Both SEEBURGER and IFS are positioned as front-runners in the leading analyst's Magic Quadrant Report.

Benefits of the SEEBURGER / IFS Partnership

- **Investment protection:** SEEBURGER and IFS solutions are developed in tandem. You are guaranteed EDI integration with both current and future platforms from IFS.
- **Faster implementation with less risk:** SEEBURGER has extensive experience integrating the BIS with IFS Applications. This, in addition to pre-written process flows, makes implementation rapid and trouble-free.
- **100 percent partner integration:** The joint solution from SEEBURGER and IFS enables a fully-enabled trading partner community with real-time communication.
- **Global support:** With offices around the world, both SEEBURGER and IFS provide your organization with the global support it requires.

SEEBURGER and IFS

The SEEBURGER B2B Gateway

The most comprehensive and cost-effective business integration platform in the industry.

- **Trading Partner Management** – Decrease time-to-market and increase efficiency with SEEBURGER's suite of applications and best practices for trading partner enablement and message tracking.
- **Business Process Management and Workflow** – With drag and drop ease, link a variety of system-provided components. Save time using pre-configured EAI, EDI and B2B workflows for your standard business process.
- **Any-to-Any Conversion** – The SEEBURGER Conversion Engine provides uniform presentation of all message structures, regardless of message syntax. Easily map relationships between inbound and multiple outbound messages. Test mappings independent of the runtime environment.
- **Monitoring and Tracking** – Monitor and visualize your business processes with components such as remote monitoring, message tracking, defined data distribution paths and the SEEBURGER RFID Gateway. (The RFID Gateway allows organizations to meet industry "Slap and Ship" requirements, manage RFID events, and visualize and trace tagged items through out the extended supply chain.

Advantages of SEEBURGER Integration with IFS Applications

Both SEEBURGER's B2B Gateway and IFS Applications are flexible, scalable solutions. Their integration allows you to be agile – changing as rapidly as today's marketplace dictates. Both easily integrate into current or legacy systems and can be implemented quickly.

With SEEBURGER and IFS Applications, your organization will enjoy:

- Company-wide lifecycle management views
- Component-based architecture for rapid implementation of new applications
- Comprehensive reporting with real-time data
- Accelerated business process through pre-defined, industry-specific processes
- 100 percent integration of your trading partner community

Ensuring compliance with your trading partners is increasingly difficult in today's global marketplace. The combination of solutions from SEEBURGER and IFS gives you unprecedented agility and visibility. View real-time data from any stage of the lifecycle, and respond quickly when change is needed.
