# The »3 in 1« Solution Package

for your  Connection

## ■ Standardise business transactions via Elemica

Elemica, established by 22 of the world's leading chemicals companies, is a central platform to boost efficiency in collaboration between purchasing companies in the chemicals industry and their suppliers. On the basis of standardised business processes, companies can conduct uniform, automated business transactions with customers and suppliers via Elemica. Once they are connected to Elemica, companies can reach via this central portal a fast-growing, worldwide network of well-known companies in the chemical industry. This electronic collaboration is based on the CIDX Chem eStandards, which in turn are based on the RosettaNet Implementation Framework (RNIF).

## ■ Enjoy the benefits of Elemica

- Cost savings resulting from standardised, automated exchange of information via a central interface – Elemica
- More effective customer interaction via support for customer-specific process requirements
- Higher process security and reliability due to reduced complexity of order processing

## ■ Connect to Elemica easily and fast

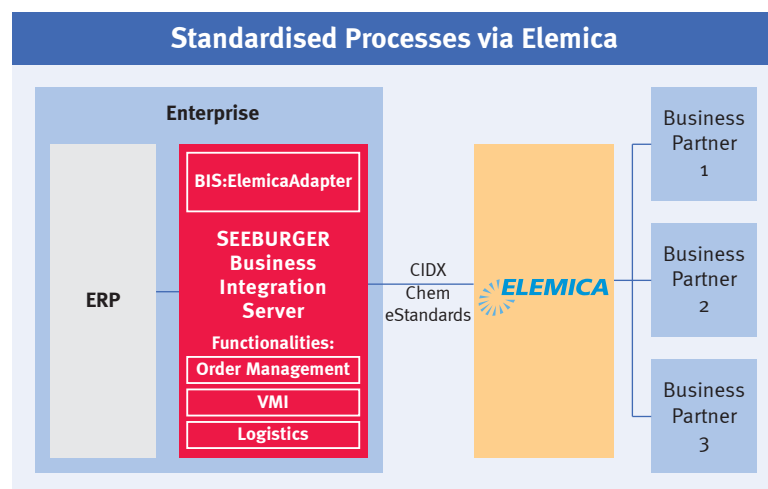

With BIS:ElemicaAdapter, SEEBURGER supplies a solution package to connect easily to Elemica within a firm and calculable cost framework. The preconfigured solution is based on the SEEBURGER Business Integration Server (BIS). It comprises both the technical components required to set up electronic processes on the basis of the CIDX standards and a customised service package which consists of adapter implementation, testing and training by experienced SEEBURGER consultants including one of three functionalities:

- Order Management (Order Create, Order Response, Ship Notice, Invoice)
- Vendor Managed Inventory (VMI) (Demand Forecast, Inventory Actual Usage, Ship Notice, Delivery Receipt)

- Logistics (Load Tender Motor, Load Tender Response, Shipment Status)

## ■ Benefits

- **Swift and successful implementation:** »in-time« and »in-budget« with the pre-packaged solution from the leading B-to-B Integration provider
- **Short Return on Investment (ROI)** due to packaged implementation and Elemica order processing advantages
- **A high level of budget security** due to a fix-priced offer
- **A high level of investment security** due to use of a »state-of-the-art« integration platform that can be flexibly expanded to cater for other B-to-B scenarios

**SEEBURGER**  
BUSINESS INTEGRATION

# Swift and successful implementation:

## The »3 in 1« Solution Package

The customised »3 in 1« Solution Package provides an easy connection to Elemica and combines a preconfigured software solution and a service package including a tailored functionality. On this way, the »3 in 1« Solution Package guarantees implementation in-time & in-budget.

### Solution Scope

#### ■ Software

- Preconfigured SEEBURGER Business Integration Server (BIS) for integration with Elemica\*
- Support for business processes order create, order change, order response, invoice, ship notice (inbound and outbound), can be expanded at any time
- Preconfigured CIDX communications (RNIF 1.1 communications module, including CIDX support)
- Converter to transform CIDX XML documents into specific in-house format (standard mappings for SAP IDOC, Baan, etc. available as optional extras)
- Preconfigured workflows for sending and receiving documents, including RecAck handling
- Comprehensive toolkit for system monitoring and administration
- Flexible options for application integration (database, script, batch, file, API, ERP connectors)

\*Licence includes data exchange with Elemica and one functionality. More features are extra-priced.

#### ■ Service

- **Implementation preparations** to ensure trouble-free project execution (plan of existing situation, requirements analysis, project planning, etc.)
- **Implementation:** Installation of BIS components, implementation of CIDX workflows and standard mappings including one functionality (more functionalities are extra-priced)
- **Connection with Elemica:** Supervision of a three-stage test procedure (connectivity and security testing, business scenario testing, partner testing)
- **Instruction:** Training of system support staff in CIDX Chem eStandards, BIS Administration and BIS Monitoring

### What is unique about the SEEBURGER solution

- A total solution including both the software and the required consulting services provided by experts with a high level of integration know-how
- Cost stability because it is offered at a fixed price
- Easy to integrate into your existing IT infrastructure via standard interfaces, making use of existing EDI processes
- Swift and successful implementation due to processes that are consistent with Elemica
