

SEEBURGER Business Integration at Insurance Companies

Challenges of the branch:

- Flexible creation of business processes
- Offer for attractive services additionally to the insurance policy
- Fast regulation of damages by accelerated internal processes
- Simpler co-operation with customers and partners

»SEEBURGER delivers the technological basis for achieving these targets and for the realisation of far-reaching advantages in competition.«

Focus internal integration of different IT-systems:

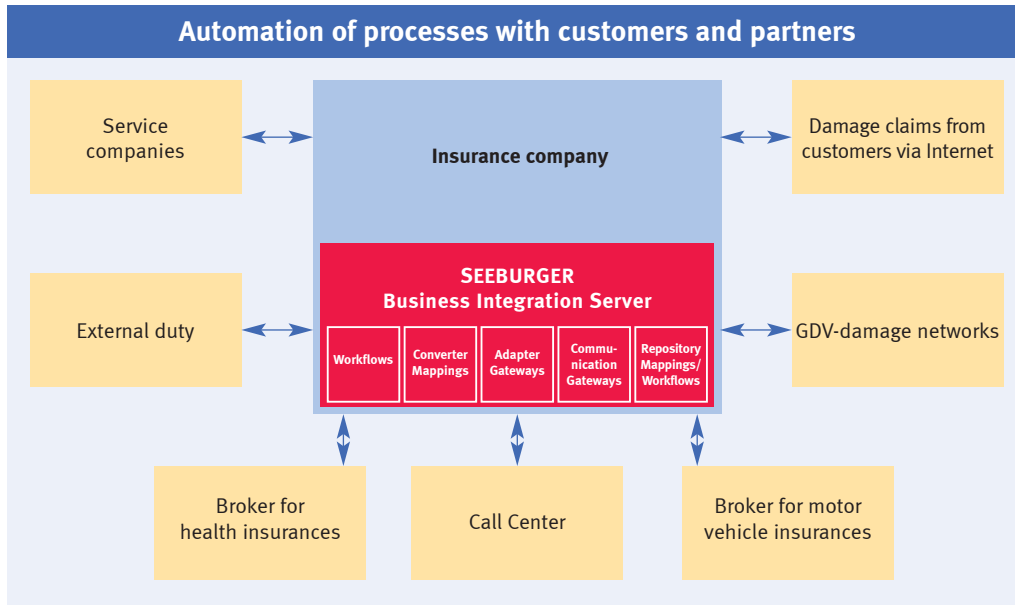

■ The SEEBURGER Business Integration BIS:ConverterServer enables

- A smooth communication of the different insurance systems.
- Efficient conversion and processing of the different data formats (XML, EDIFACT, ...)
- Lowering costs because of improved transmission of great data volumes
- Increasing the customer's contentment owing to accelerated processes
- Security and reliability by the employment of newest technologies
- Investment protection owing to a simple integration of the software into the already existing IT-infrastructure
- Minimisation of the programming expenditure by a central system
- Fast amortisation of costs with a high return on investment

Collaborative Commerce

with Customers and Partners

Focus external integration of different IT-systems:

■ Use the advantages of Collaborative Commerce with the SEEBURGER Business Integration Server

- Removal of manual processes and avoiding of error sources
- Different systems (of brokers, call-centers, ...) can be integrated into automated processes
- Accelerated exchange of insurance documents (reinsurance claims, insurance premiums-advice of payment, ...)
- Integration of branch market places, insurance portals and Web Services
- Selection among a variety of communication ways (Internet, VAN, ...)
- Improved after-sales service by using new media
- Considerable lowering of transmission costs
- Maximum security by security technologies (electronical signature, ...)
