

The SEEBURGER Logistic Solution

SEEBURGER provides the **solution**, in order to integrate the diverse systems and processes of the different participants in the logistic process.

■ The Challenge

Logistics is the physical conversion of customer wishes, values, influence factors, in short – of the national economic spirit of the times. While the goods volume of the economy does not appear to grow, the number of sendings and therewith the complexity of logistic processes is booming. The requirements of a modern logistic service are more diverse than ever before.

■ The Future

Central themes such as globalisation and **»collaboration«** are being focused upon in logistics. The logistic servers are the architects of these changing structures. This often requires a new way of thinking, new knowledge and new **»tools«**. More than ever, information technology (IT) today belongs to the production factors of the logistic service creation. According to the ruling of logistic basis factors, a secure use of IT is a decisive advantage in competition.

■ SEEBURGER – The Answer

In the integration of diverse systems and processes lies the potential for considerable cost savings. SEEBURGER offers with the **Business Integration Suite** the data hub with the best technology on the market. This open, agile, customisable **SEEBURGER solution** can guarantee that the **complete integration service** spectrum in the integration of customers, suppliers, partners as well as group companies is secure and efficient.

»The SEEBURGER Logistic Solution – the made-to-measure solution for the branches.«

With the SEEBURGER Solution, a maximum **Return on Investment** can be achieved in a short time. **16 years experience** and more than **6.000 customers** worldwide speak for SEEBURGER.
