

**14 SEEBURGER EDI Adapters SAP-Certified for Integration with SAP NetWeaver® PI ; SEEBURGER's Total SAP-Certified Adapter Library Hits 28**  
*Adapter Selection Covers Multiple Industries & Communication Protocols*

ATLANTA (September 8, 2008) - SEEBURGER Inc. today announced the certification of 14 EDI adapters for use with the SAP NetWeaver® Process Integration (SAP NetWeaver PI) offering Release 7.1, along with recertification of 14 additional adapters designed for use with the SAP NetWeaver Exchange Infrastructure (SAP NetWeaver XI) Adapter Framework 3.0. Both sets of adapters integrate natively with the SAP NetWeaver technology platform, eliminating the need for a standalone EDI application.

The certifications by the SAP Integration and Certification Center (SAP ICC) advance a decades-old relationship between the two companies that has yielded joint projects around the globe. More than 1,600 SAP customers are currently using SEEBURGER EDI solutions – including almost 400 on SAP NetWeaver alone - to seamlessly integrate EDI operations with SAP business processes.

SEEBURGER's adapters that have achieved SAP-certified integration with both SAP NetWeaver XI and SAP NetWeaver PI include dedicated EDI solutions for the chemical, high-tech, automotive, aerospace & defense, consumer products, paper, pharmaceutical, retail and utility industries, as well as technical adapters for generic EDI, EDIINT AS2, OFTP, VAN Access and cross-industry payments. A complete list of certified adapters can be found below or at [www.seeburger.com/xi-pi-adapters](http://www.seeburger.com/xi-pi-adapters).

SEEBURGER and SAP will present the SAP NetWeaver PI offering and associated SEEBURGER adapter solutions in hands-on seminars at SAP TechEd 2008 Las Vegas in September and at SAP TechEd 2008 Berlin in October.

"These new adapter certifications and recertifications provide organizations using SAP NetWeaver with access to our robust EDI functionality, whether they continue to use SAP NetWeaver XI or implement SAP NetWeaver PI to handle application integration," said SEEBURGER Executive Vice President Thomas Kamper. "Having 28 adapters that have achieved SAP-certified integration is a major achievement that shows how closely we work with SAP to stay current with their products and certification requirements."

Each SEEBURGER adapter utilizes the toolset of SAP NetWeaver to handle the EDI configuration, workflow, mapping and communications necessary to convert business documents from industry standards into the XML/SOAP-based format used by SAP NetWeaver. The adapters accommodate all industry and regional-specific data standards and communications protocols to automate business processes with customers, partners and suppliers for organizations in virtually every industry sector and global geographic location.

The new SEEBURGER adapters for use with SAP NetWeaver PI, and the recertified SEEBURGER adapters for use with SAP NetWeaver XI, are available immediately from both SAP and SEEBURGER sales and services organizations around the world.
