

Data exchange in the energy branch with power

With the liberalisation of the electricity market the need for inter-company collaboration has risen enormously.

The SEEBURGER integration solutions provide the needed automation of the business processes between the market participants.

■ Challenges of the branch

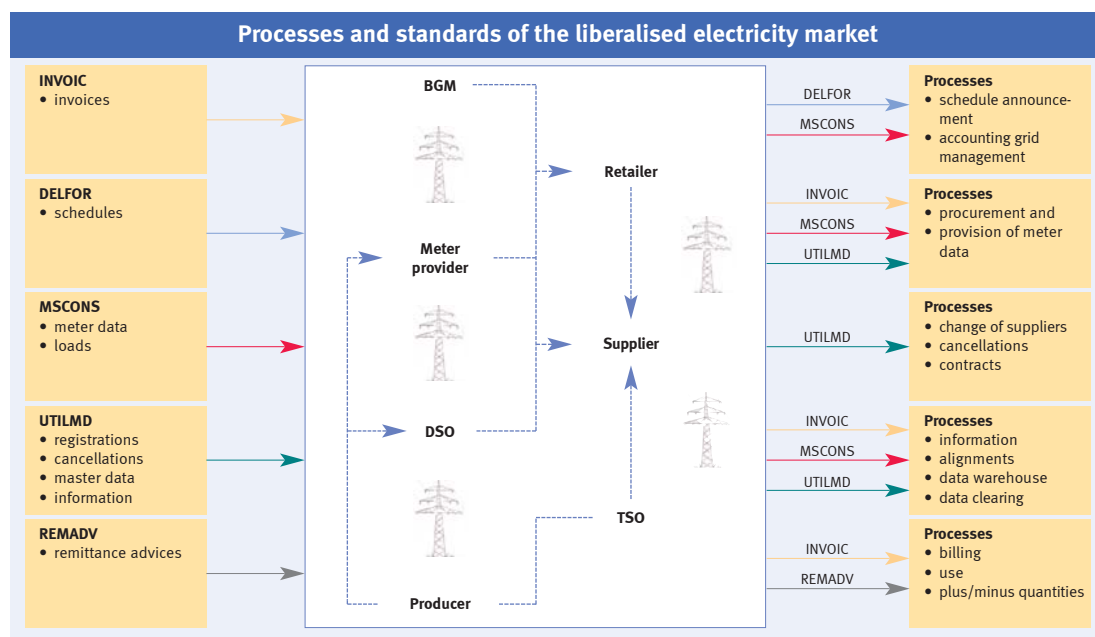

- Liberalisation of the energy market
- Increasing competition
- Fusions and acquisitions
- Multiplicity of suppliers
- Increasing demands by the customers
- Increasing complexity through product differentiation
- Pressure to reduce costs and increase performance

»Automated processes between the market participants,

customers, suppliers and service providers

with the result of cost reduction and increase of performance«

Automation in the energy branch

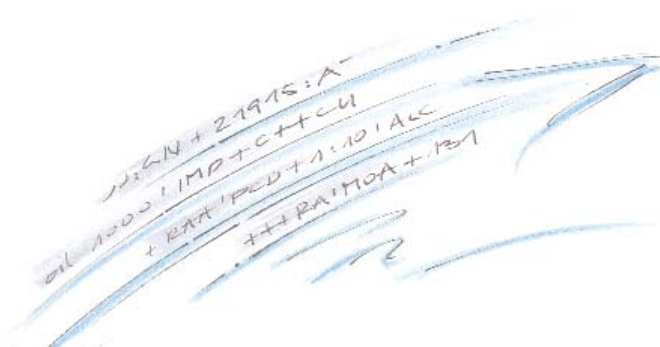

Use your energy and our software
for an optimal design of your data flow.

■ Your advantages

- Collaboration with the systems of suppliers, customers and service providers shortens the processing times considerably and enables extended customer service
- Clear partner management for the easy administration of master data and processing regulations of different partner (transmission network providers, customers, ...)
- Coupling to all current ERP applications, CRM- and SCM-applications, as well as legacy-systems; breaks in media, manual effort and error sources are reduced
- Sector specific characteristics of the energy branch are respected in the software modules
- High performance system for the processing of mass data
- Availability and up-to-dateness of relevant data can be ensured with intelligent workflow technology
- Transparency through central control and monitoring of the business processes
- Highest flexibility and future-security due to new transmission forms via Internet as well as traditional communication ways as VAN, Point-to-Point etc.
- SEEBURGER is member of various workgroups for the standardisation and documentation of processes
- Using standards reduces investment costs and shortens implementation and introduction times
- Investment security through modular extensibility of the system
- Optimal care by SEEBURGER Consulting with long-term branch experience
