

B2B/SCM Monitor for SAP

SEEBURGER End-to-End Monitor for SAP

Improve service delivery and customer satisfaction with immediate insight into critical logistics processes.

SEEBURGER B2B/SCM Monitor for SAP – a central monitor providing transparency and accountability

Reduce costs and increase customer satisfaction by providing all relevant information in real-time from a central location that is fully integrated in SAP.

Reduce Costs with Standards

Fast and cost effective implementation through a preconfigured standard solution.

- Based on SAP Standards, no SAP industry solution as a pre-requisite.
- Seamless integration into B2B Standard Solutions.
- Customization guidelines for project use.

Focus

The SEEBURGER B2B/SCM Monitor for SAP is a fully configurable, central monitor in SAP that provides easy viewing and editing of any complex logistics processes.

Monitor Functions

The B2B/SCM Monitor from SEEBURGER offers all the functionality of a centralized, system and company-wide end-to-end monitor.

- Display and analysis of incoming and outgoing documents from SAP and BIS/SAP PI.
- Direct access to data and functions for trouble-free processing and display of follow-on-documents.
- Document related access to process-specific functions.
- Automated monitoring, document status and reporting functions.
- Plausibility check, Tolerance check, etc.

Customer Testimony

Costs are permanently reduced by consistently standardizing the solution. All common industry requirements are met.

End-to-End Monitoring

Monitoring of all processes, including those in the downstream ERP system. Maximum transparency of the solution.

Process Reliability

Extensive tools for full monitoring, control and documentation of all processes.

Dependable ROI

The clear roadmap for SEEBURGER Solutions ensures that future B2B requirements are also covered.

Scalability

The solution grows as you do. One single technology platform for all requirements, from the smallest solution to meeting needs of global corporations.

B2B/SCM Monitor for SAP

The screenshot displays the 'SCM Cockpit: Process Monitor' interface. It features a top navigation bar with tabs for 'Beleginformation', 'Einstellungen', 'Status', and 'Toleranzprüfung'. Below this, there are several data fields for a purchase order, including 'Lieferrant', 'Strasse', 'Ort', 'Land', 'Prozess', and 'Int Status'. A central table lists 'Alle Dokumente' with columns for Status, Doc-Nr., Material, Bezeichnung, Log Mat., Kundenmaterial, Auftrmg, Vertrag, LF-Nr PUP, Belegdatum, Abholdatum, Abholzeit, Wweg SP, VGr, VGr, Werk, Nachtr tp, Nachtr Var, and Nachtr F. The table contains multiple rows of goods movements, including 'Windschutzscheibe' and 'Standardkarton'.

Access to monitoring information is based on user roles and a work basket for smooth control of processing in SAP and BIS.

SEEBURGER AG stands for

„Everything from one source“ (software solutions, development, process consulting, outsourcing and SAP expertise) ensured by reliable employees. Trusted by nearly 9,000 satisfied customers and with 25 years of B2B experience and high-quality product portfolio.
