

SEEBURGER RRM+ Service

enway Enables Regional Electricity Producers to Easily Report to ACER

The challenge

enway is revolutionizing the energy market by enabling the end consumer to buy electricity directly from the regional producer. A challenge to this approach is that small, regional producers must report their transactions to the Agency for the Cooperation of Energy Regulators (ACER), the governing body for energy companies in the EU. This reporting can be cost-intensive and complex for small partners. enway decided to help regional producers by making it easier for them to report, or by taking the task off their hands completely. This support is provided by SEEBURGER RRM+ Service.

The solution

SEEBURGER RRM+ Service is registered as an official Regulatory Reporting Mechanism (RRM) at ACER and as a 3rd party service provider at REGIS-TR, and is therefore able to submit reports to the regulatory authorities. Customers can transfer their information to SEEBURGER in whatever format is most convenient – via CSV upload, XML upload via SFTP or an Excel template. SEEBURGER converts the data into the required format and checks the transactions internally for completeness and content format. After successful validation, the data is sent to and processed by ACER or REGIS-TR.

Transactions can be searched for and displayed in the RRM at any time, so that customers can meet relevant legal requirements (REMIT and EMIR) and monitor the results. SEEBURGER RRM+ Service also offers delegated reporting, with which a company can submit reports for its partners. enway uses this service to relieve its small regional producers of the burden of reporting.

With this feature, the SEEBURGER RRM+ Service supports enway and its future-oriented approach toward renewable energy.

About enway

enway is a platform that enables renewable energy producers to deliver their electricity directly to end customers. Together with its partners, enway supports more than 20 producers with highly automated processes that help them deliver electricity.
