

SEEBURGER Express for EDI/B2B

**Consolidated, Affordable EDI/B2B Integration
for Small and Mid-sized Enterprises**

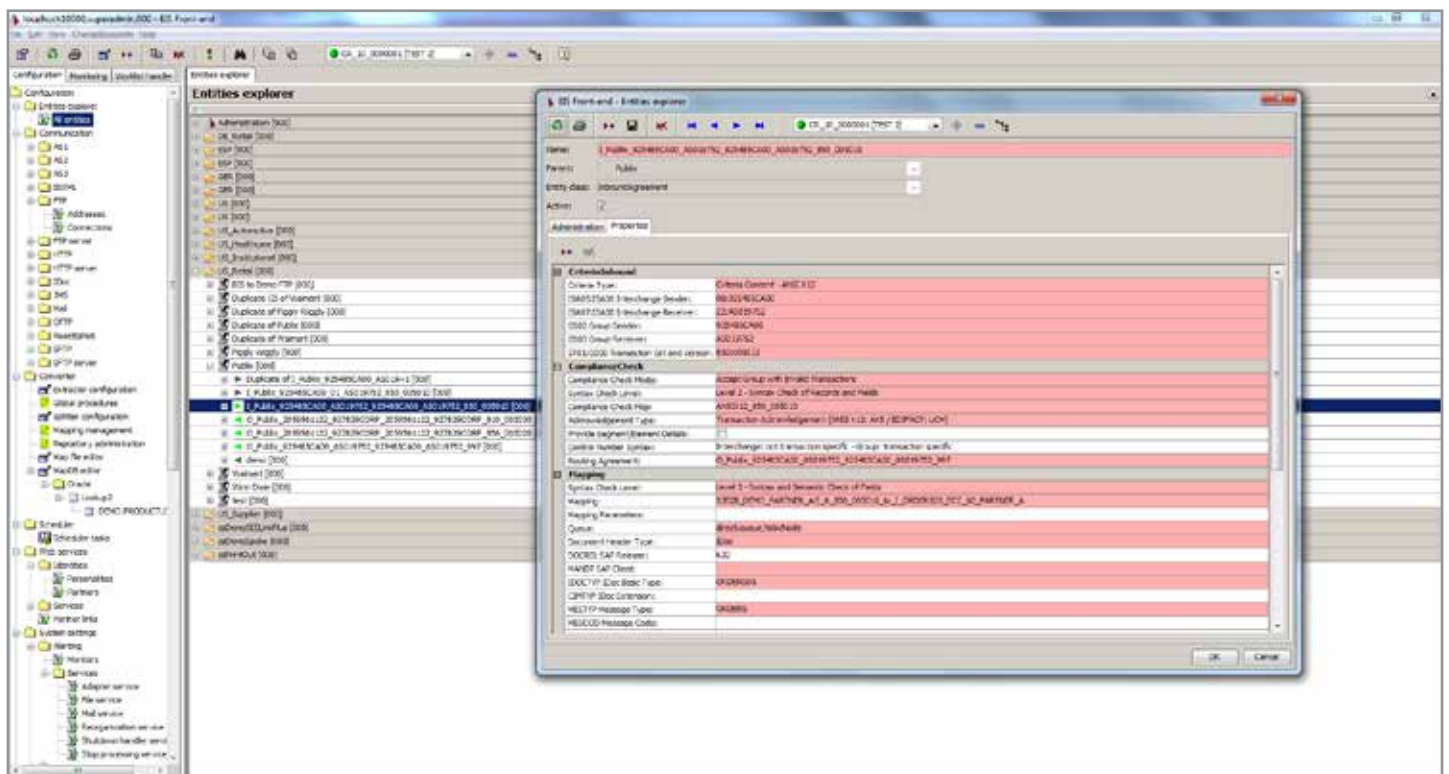

Your customers and partners are the lifeblood of your business. To win and keep their business, your business needs to connect electronically with them on their terms, process their orders promptly and without errors, and deliver consistently great service.

Unfortunately, this traditionally has required in-house EDI technicians or expensive, inflexible EDI systems – or both. If you're working with multiple Web EDI portals, just managing these portals alone can very quickly become a full-time job for a trained EDI staffer.

The whole process is too labor-intensive, too expensive and too error-prone. And what small or medium-sized business can afford that?

Introducing **SEEBURGER Express for EDI/B2B**, an affordable, easy-to-use and -deploy solution that automates all your electronic business data transfers – in a single, consistent and secure system. SEEBURGER Express improves service to your customers and partners, while saving labor resources, reducing errors, and eliminating the costs of specialized EDI staff and EDI systems.

Onboarding new customers or partners is point-and-click fast, easy and completely automated with SEEBURGER's Entity Explorer.

SEEBURGER Express for EDI/B2B Advantages

- ✓ Packaged, affordable, out-of-the-box EDI/B2B for SMEs that process
- ✓ Based on SEEBURGER's industry-leading EDI/B2Bi/ERP integration technology (9,000+ customers)
- ✓ Fully automated: any-to-any data mappings, data translations, message generation, error notifications
- ✓ End-to-end visibility with real-time message tracking
- ✓ Quick-start deployment: install, implement, map, on-board partners and go
- ✓ Requires no in-house EDI skills or expertise
- ✓ Attractive price

Industry-Leading EDI/B2B Automation Designed Specifically for SMBs

SEEBURGER Express for EDI/B2B is a pre-packaged solution for small and mid-sized businesses including three message-tracking users.

SEEBURGER BIS Express for EDI/B2B is based on the SEEBURGER Business Integration Suite (BIS), the industry's only consolidated, secure communications suite that handles all business data transmissions – from EDI to B2B to secure MFT (Managed File Transfer) – with a single transmission gateway, eliminating the cost and risk of multiple systems and multiple gateways.

SEEBURGER BIS is delivered on a 100%-SEEBURGER-engineered platform that lowers the total cost of ownership and reduces implementation time. Our customers include thousands of businesses worldwide, including Fortune 500 companies, multinationals and governments – and small-to-mid-sized enterprises – across more than 15 industries.

Connect to Anything, Anywhere – Securely, Easily and Efficiently

SEEBURGER Express includes everything you need to be successful, quickly, with modern EDI/B2B integration. It lets you connect your business to anything and anyone anywhere – securely and efficiently.

For example, you can connect with:

- Any exchange (orders, delivery notes, invoices and more)
- Any transaction and message format (structured, unstructured)
- Any standard (SWIFT, ODETTE, OFTP and more)
- Any communications protocol used in your industry
- Any business partner

End-to-End Visibility – and More

SEEBURGER Express gives you full end-to-end visibility of your all your EDI transactions, with an easy-to-use graphical user interface, real-time message tracking, and automated notifications for faster error handling. Through online updates, SEEBURGER Express automatically keeps up with the latest updates to common EDI, industry and transmission standards.

No more juggling multiple Web EDI portals or keeping up with their protocol changes. No need for dedicated EDI staff or skills, reducing costs and headcount. No need for internal B2B integration know-how.

Packaged Solution

Ready to use B2B-Solution for Small and Mid-sized Enterprises

“With the Packaged Solution we have been successful in significantly driving down B2B-operating costs (TCO) by utilizing SEEBURGER’s Standard Solutions.”

Easy to Deploy and Operate, Ready to Grow with You

SEEBURGER Express for EDI/B2B deploys rapidly, reducing business downtime and risk. Through the aggressive use of standards and pre-existing content (master data on business partners and their business processes), we’ve eliminated the need for those customizations that make traditional EDI projects so lengthy and costly. Most businesses will be up and running on SEEBURGER Express for EDI/B2B within weeks. You can extend functionality with SEEBURGER Express for Managed File Transfer, or move up to full BIS via a simple license extension.

Move Up to Modern EDI

With SEEBURGER Express for EDI/B2B, you can simplify the difficulty of manually supporting multiple Web portals or maintaining an expensive EDI system and staff to communicate with a handful of partners. You’ll reduce EDI costs, reduce business risk, and speed up business cycles.

You’ll be able to:

- ✓ Communicate quickly & consistently with all of your customers
- ✓ Onboard new customers and partners faster
- ✓ Achieve simple, end-to-end visibility of your supply chain
- ✓ Improve cash flow through end-to-end EDI automation
- ✓ Meet Critical-to-Quality, Perfect Order and other customer requirements more easily
- ✓ Simplify compliance and DLP

Standards

By leveraging the use of standards, sustainable cost reduction can be achieved. Full support of all industry specific requirements.

End-to-End Monitoring

Delivering full End-to-End Monitoring of all processes; from the ERP to the trading partner, the complete process is monitored giving 100% visibility and control.

Process safety

Comprehensive toolset for development, monitoring and control of business processes.

Investment guarantee

The roadmap for SEEBURGER Solutions guarantees support for all future B2B requirements.

Scaleability

Fully scalable solutions – One single technology platform for SME’s to large enterprises.

SEEBURGER Express for EDI/B2B

- Standard trading partner management for EDI/B2B
- INHOUSE, XML and ANSI X.12 conversion adapters
- Hotfolder, FTP(s) client, email communication adapters
- BPEL scripts for EDI/B2B inbound/outbound processing
- Error handling with automated notifications
- Up to 10 front-end users
- Message tracking with 3 users
- 1 Dual Core CPU (max. 2) for transaction processing – scale by adding more CPU and RAM to the server
